Hi

About tag editor have looked at these on os4depot?? i remember to use few of them back in the first days of amiga os4 and they worked fine..

<http://www.os4depot.net/index.php?function=search&tool=simple>

About network stack what are looking for exactly? RoadShow isn't enough?

what i would like to see is a proper way to create in a simple way shared folder accross the network between amigas and other system (from amiga to amiga and from/to amiga or other systems..)

About compare folders dir, have you looked at this?:

<http://www.os4depot.net/index.php?fun ... /filetool/comparedirs.lha>
