@Hans

It's been a crazy few weeks and my spare time for working on sgit has been non-existent! It should become a bit more relaxed in a couple of weeks and then I can get back to this.

Thanks for the extra bits to look at. Part of my initial work for the commit command used the `git_status_list.. ()` api that's in libgit and it might be that helps if I use that for the git status command too.
