It was a serious question actually.

But I lost track of what is "os" and what is enhancer...and I frankly don't give a damn anymore.

So, sorry if I step on anyone's toes, but the whole "os" vs enhancer situation is so damn stupid that I don't really want to think about it.

And no, I'm not *that* naive to think that there will ever be something released from hyperion again what has amigaos4 printed on it.
