Sorry, I was unavailable and busy recently... Anyway, Artur contacted me directly on discord, he seems to be more experienced with porting so I provided him all my codes and information I had, I'm really glad he got into it coz I didn't have so much time recently.

Anyway, feel free to compile it for OS4.1 as You already did, the most important is that someone got it working :)

I think I will have some time now again, so I can focus on some other project.

Thanks guys You got it working :)
