Hello guys,

aiostreams v1.1 is available. I will upload it later today at OS4Depot as well, but if you want to test it, you can download it from <https://github.com/walkero-gr/aiostreams/releases>

In this release the following changed:

- * Mixer.com script added
- * Cleared a lot of code in twitch.py script
- * Documentation updated

In the cfg.py file the only changes are the twitch and mixer weighted lists for the quality. The rest are the same.

Have fun and please provide your feedback.
