Not that i'd understand whats going on, but isnt a width and height of 32 a little small for a game screen?

User picked target 'bladerunner-final-win' (gameid 'bladerunner-final')...

Looking for a plugin supporting this gameid... Blade Runner

Starting 'Blade Runner with restored content'

glintFormat 6408, glFormat 6408, glType 5121, width 32, height 32

glintFormat 6408, glFormat 6408, glType 32820, width 1024, height 512

WARNING: GL ERROR: GL_INVALID_OPERATION on glTexImage2D(0x0DE1, 0, _glIntFormat, _width, _height, 0, _glFormat, _glType, __null) (backends/graphics/opengl/texture.cpp:142)!

Blade Runner

From the dark recesses of David Leary's imagination comes a game unlike any other. Blade Runner immerses you in the underbelly of future Los Angeles. Right from the start, the story pulls you in with graphic descriptions of a grandmother doing the shimmy in her underwear, child molestation, brutal cold-blooded slaying of innocent animals, vomiting on desks, staring at a woman's ass, the list goes on. And when the game starts, the real fun begins - shoot down-on-their-luck homeless people and toss them into a dumpster. Watch with sadistic glee as a dog gets blown into chunky, bloody, bits by an explosive, and even murder a shy little girl who loves you. If you think David

Leary is sick, and you like sick, this is THE game for you.

JW: Don't forget the wasting of helpless mutated cripples in the underground.
It's such a beautiful thing!

DL: Go ahead. Just keep beating that snarling pit bull...ignore the foam
around his jaws. There's room on the top shelf of my fridge for at least one
more head... - Psychotic Dave
