Yesterday released v1.2 at OS4Depot with the following changes.

v1.2

- \* Vimeo.com script added
- \* Dailymotion.com script added
- \* Skaitv.gr script added
- \* simplem3u8 parser updated to support URLs starting with "../"
- \* Added links in the AmigaGuide file, that use URLOpen
- \* Added the silence parameter, that prevents the script to output anything, except the errors or the results of a search
- \* Documentation updated
- \* Removed version per script
- \* Added Top Games list in twitch.py script. This returns the 50 Top Games based on the number of viewers.
- \* Added Top Streams list in twitch.py script. This returns the 50 Top Streams based on the number of viewers.
- \* Increased game search results list to 50 items in twitch.py script.
