Tried demo/WIP on my SAM460ex and works flawlessly!!!

GREAT GAME MAN!!!

Played with an USB joypad without problems.

Glad you like it, and thanks for the feedback :)

BTW any idea if too hard to implement localizable options/messges?

Technically it's possible, but it isn't necessary: the texts consist of just a bunch of simple (and common) lines, and the game can be played even without understanding a single word. Given the work that remains to be done and my other projects, I won't invest energies on localization (sorry!).
