Seems weird. The server is configured with:

KeepAlive On

MaxKeepAliveRequests 100

KeepAliveTimeout 60

And this is the header I get from wget:

HTTP request sent, awaiting response...

HTTP/1.1 200 OK

Date: Wed, 11 Sep 2019 05:33:57 GMT

Server: Apache/2.4.18 (Ubuntu)

Pragma: public

Expires: 0

Cache-Control: public

Content-Disposition: attachment; filename="amiarcadia.lha"

Content-Description: File Transfer

Content-Transfer-Encoding: binary

Accept-Ranges: bytes

Content-Length: 5000476

Content-Type: application/lha

Connection: Keep-Alive

Length: 5000476 (4,8M) [application/lha]

From:

wget --server-response --spider <http://os4depot.net/share/emulation/gamesystem/amiarcadia.lha>

What parameters are you using for wget?
