Hello

Nothing related but your program make me think about YoutubeMp3 that allow to get MP3 from YouTube video clips

Exemple:

[https://youtubemp3.today/?url=https%3A ... 2Fwatch%3Fv%3DMtMQsZn8GbY](https://youtubemp3.today/?url=https%3A...%2Fwatch%3Fv%3DMtMQsZn8GbY)

Would be nice to have an Amiga tool that make a search for youtube clips for (say) "Michael Jackson" then give you a list of songs ready to download/play as MP3
