Looks you might have a NULL IDOS pointer. If you add the following code to your main() function it could give a hint as to what is going wrong:

```
extern struct DOSIFace *IDOS;
extern unsigned const int *__newlib_minversion_ptr;

printf("IDOS: %p\n", IDOS);
printf("Minimum newlib version: %u.%u\n",
    *__newlib_minversion_ptr >> 16,
    *__newlib_minversion_ptr & 0xffff);
```
