Good to see it works for you.

The OpenGL mode needs GLEW which we don't have or I couldn't find it anywhere.

I know about the stack cookie stuff, I'm just lazy :)

@K-L Try ~~this link~~ but I also want to know if 0.16rc2 on OS4Depot has the same crash for you.

Edit: Updated binary using libSDL built by @kas1e

Edit 2: Link removed.
