Hehe, you seem to forget you are talking to noob 😊

Mixing is easy, you just have to forget that there is libstdc++.so in **yet another directory** i completely missed.

I was using ancompletely outdated libstdc++ the whole time...funny that it worked at one time.

Trying to rebuild and test again...

Thanks for the hint about SDL1 missing SDOL\_LoadObject...something for the future in SDL1 port?

Should i write a bug report?

Take your time to recover...and thanks for all the hints
