I tried today aiostreams dlive cript on OS4 and it works just fine here. I believe that, since you do not get an SSL error, it should work on your machine as well. I guess that for some reason you can't reach the website to get the m3u8 file. The other scripts work on your os4 machine?

@white

Try use ffplay like

```
vPlayer = "APPDIR:mplayer"
```

```
vPlayerArgs = "-quiet -really-quiet -forceidx -framedrop -cache 8192"
```

```
sPlayer = "APPDIR:ffplay"
```

```
sPlayerArgs = "-loglevel quiet -infbuf -skip_loop_filter all -skip_frame noref"
```
