There is a new version at <https://github.com/walkero-gr/aiostreams/releases/tag/v1.4.2>

From this package you can get only the twitch.py script, which is the only one changed, against v1.4.1. Hopefully this fixes the problems with Twitch, but have in mind that Emotion player will not work. You better use ffmpeg.

I will do a proper updated version on OS4Depot later today, but you can try this one and give me your feedback, if it works for you.
