URL:

I don't remember if I had already asked for some information on Odyssey.

I did a little hardware update, now odyssey works very well on youtube without yt.rexx (a program that I really appreciate and still use).

I wanted to ask if it is possible to increase somehow the loading of the pages and the suggestions to make it go faster.

Acting on some browser settings and which files I could modify to do this.

here odyssey that works directly with winuae without yt.rexx

Thank you for every valuable suggestion and your help!
