URL:

Ok, so i now am hitting the exact same error as @seventh wonder did.

But i have no idea how the 32bit derivatives are called that i need to download/install in favour of 64bit.

If that means i have to repeat the whole process by starting to install the 32bit version of msys2 i'm rather going to wait for your new script

Hi kas1e

I get following error when compiling OS4 crosscompiler. Is there a way to fix this ?

In file included from C:/msys64/amiga/adtools/binutils/repo/gas/hash.c:34:

C:/msys64/amiga/adtools/binutils/repo/gas/hash.c: In function 'hash\_new\_sized':

C:/msys64/amiga/adtools/binutils/repo/include/obstack.h:272:5: error: cast between incompatible function types from 'void \* (\*) (size\_t)' {aka 'void \* (\*) (long long unsigned int)'} to 'void \* (\*) (long int)'

[-Werror=cast-function-type]

(void \*(\*)(long)) obstack\_chunk\_alloc, (void (\*) (void \*)) obstack\_chunk\_free)

^

C:/msys64/amiga/adtools/binutils/repo/gas/hash.c:93:3: note: in expansion of macro 'obstack\_begin'

obstack\_begin (&ret->memory, chunksize);

^~~~~~
