Which Enhancer-package and RadeonHD-driver for SAM460

Hi Amigans,

I have a SAM460 with a Radeon HD graphics card and wonder what to buy when it comes to Enhancer-packages and the RadeonHD-drivers.

There are three Enhancer-packs available, as well as two separate RadeonHD-drivers, on Amistore.

I'm tempted to purchase the standard Enhancer due to price, but this one has RadeonHD 1 included, while the Enhancer Plus has RadeonHD 2.

Is the difference big between RadeonHD 1 and 2 in performance? Is it worth the extra money to get RadeonHD 2?

Thanks in advance for your help. :)

PS: I'm running AmigaOS 4.1 FE Update 1.
