Hi and thanks so much for your help. :)

As far as I could see, one needs to buy the Enhancer software pack before one can buy the "Graphics Enhancer" pack that includes Radeon HD 3. This amounted to apx. £100. Therefore decided to buy the cheapest HD-driver and instead purchase the full new Enhancer 2.0 package when it becomes available.

It is not easy keeping track of the various Enhancer packages and it is probably more confusing for people who are completely new to AmigaOS 4. Agree with Kas1e that it would be easier with one package containing everything.
