@samo79

Me.

Another issue, occurred today : I tried to update today and I got a Login prompt window, to which I entered my credentials. It failed to update. Looking at the au.log, it shows :

Quote:

```
19:36:04 Trying to connect to: www2.hyperion-entertainment.com on port: 80
19:36:04 Connected
19:36:04 Received HTTP header file...
19:36:04 (403) The current username and password is forbidden - prompting user to enter correct login
for this realm
19:36:04 Prompting user for login details...
19:36:24 Login cancelled
19:36:24 No logon details supplied, updating aborted
19:36:24 (403) User is forbidden - Check your login details for this realm
19:36:24 HTTPFetch error: This user is forbidden to access this resource
19:36:24 Synchronising with server: 'amiupdate.net/SdkServer'...
19:36:24 Requesting HTTP header file from server...
19:36:24 Trying to connect to: amiupdate.net on port: 80
19:37:40 Failed
19:37:40 Failed to establish connection to: amiupdate.net error: Connection to the server failed
```

---

19:37:40 Failed to receive HTTP header file...

19:37:40 HTTPFetch error: Transferring the file was not possible due to a previous error

I can login to <http://hyperion-entertainment.com/> successfully.
