Excuseme, but I don't understand you, I understand that you isn't very motivate with the develop of Wings, but why you started other projects of Cinemaware or why you got pre-orders? this I don't understand, you didn't see where did you go? or only you though that Cinemaware was going to hire you then leave you lying while you continue accepting pre-order and Cinemaware got our money and you only got problems with the Amiga users that we appreciated your work, before of Cinemaware's fraud.

Sorry but I put my money in Wings and if I know these problems I didn't have spend my money for nothing.
