@Templario

For not having read my explanations at all you have a bit too many half-baked semi-quotations in your previous comment, but well, I guess I don't have to understand everything or everybody 😊

@all

The [MorphOS demo](#) has been updated. Thanks to Ernst Eiswürfel, who notified me that I had forgotten to remove an old, now contra-productive "some-GPUs-have-wrong-fog-color-bug"-patch which eventually resulted in pink dogfight fog. The respective bug has been fixed in MorphOS long ago but in the demo-build the patch was still active 😊
