Tried with your config of DOSBox, with your .ins, with your heroes.cfg, and it still works, damn :(will do more tests.

For it always reproducible ? 100% the same result all the time ? And you 100% use exactly that archive:

http://kas1e.mikendezign.com/aos4/dosbox/DOSBox_r3.lha

?

Plz double-triple check. "version" on that new binary should say "DOSBox r4293 (20.11.2019), build date (8.2.2020)".
