I'm not sure why the test doesn't make any sound on my X1000 but it could be my settings. Here are my AHI settings:

Driver: hdaudio.audio version 6.22

Music unit: Unit 0:Hifi 16 bit stereo++ (44100 Hz)

Unit 0: hdaudio:HiFi 16 bit Stereo++ (44100 Hz)

The device.audio that shows 'Unit 0' in the AHI 'Music unit' settings is version 6.22.

I also have the Mixer docky installed in AmiDock.
