I recently bought this one:

AMD Radeon RX550 4GB 2DP Card; SKU: 3TK71AA

([https://www.amazon.es/HP-Tarjeta-AMD-R ... 3&creativeASIN=B07DH4PMKG](https://www.amazon.es/HP-Tarjeta-AMD-R...3&creativeASIN=B07DH4PMKG))

Is single slot, has 2 display ports and 1 hdmi, with a dvi2hdmi cable I plugged into my "old" monitor without problems.

Drawback: I don't see/get my Uboot boot menu, as this gfx card has UEFI rom IIRC. "Redirected" to serial in case I'll need to change/see some settings and with an external terminal/PC no problem then.

Is an RX Polaris 12. Quite happy with it.
