It seems MBeijer start integrating OS3 code into the official OS4 repo :)

He also added some OS4 code to finally compile SDL1 as shared library ... would be interesting to see if everything will works already !

[https://github.com/AmigaPorts/SDL/comm ... ab1ede3ab5d15814199eda87f](https://github.com/AmigaPorts/SDL/comm...ab1ede3ab5d15814199eda87f)

If so, perhaps the same could be done also in SDL2 for compile it as shared :)
