Great that you can confirm his instructions work.

I've got broken AHI headers, so I still got GetInterface()/DropInterface() errors with my last build. Probably have the old SDK's headers after all.

Fixing that now...

EDIT: Adtools really should be updated to install the latest SDK by default, as [kas1e suggested back in 2018](#). Sure, it's not hard to update manually, but it's a pointless waste of people's time. Everybody should be using the latest SDK (which is actually old too; it's from 2015).

EDIT2: Just checked my adtools sources, and it downloads the old SDK, but saves it as SDK_53.30.lha. Had me fooled.

Hans
