- Enabled WebP support again, it seems it had been disabled at some point.

And by checking the MorphOS archive i found a very small typo in bookmark HTML file in our version, that file will be generated from Odyssey when you start creating personal bookmark :)

All the title references in HTML generated file still have an old reference for "OWB MorphOS"

OWB MorphOS Bookmark

OWB was also the old name scheme of MorphOS version until 1.12 afaik .. now it might instead show "Odyssey AmigaOS4" or something similar
