About bookmark file and "OWB Morphos" words: that not typo, it was like this of course.

Sorry, of course not "typo" .. i meant "replacing"

Quote:

But if you mean as forgotten to replace, then it didnt specially, to allow users from both oses import/export that file between oses. If change it now, it will mean no more ability to cross-use the same file, which is more important imho than words changing.

Ah, i did not thinked about importing to other versions of odyssey for other systems ,, i though it was merely a replaceble HTML text title
