webp datatype works fine (as you say).

Using lbrowse 2.5.2 and the webp_dt it shows correctly the images from

<https://developers.google.com/speed/webp/gallery1>

and using dwebp from [http://www.os4depot.net/share/develop ... rary/graphics/libwebp.lha](http://www.os4depot.net/share/develop...rary/graphics/libwebp.lha)

shows image correct too.

Maybe if you can build oddyssey using such sdk/lib (if not using those already)
