Got another kind of crash, this time when browsing the HunoPPC site by opening a page (on same site) in a new tab ... the crash was a DSI one, but for some reason the crashlog cannot be saved at all .. so i saved a grab, ask if you need

Probably the site visited is not so important, but the relevant part of the crash is:

Type: DSI

Pointer instruction: 0x081653C

Alert: 80000003

Module: kernel
