I want to add new agents to made "spooof as" menu to have more modern things, and so far localy i have that (that list of new ones and old ones):

```
STATIC STRPTR useragents_labels[] =
```

```
{  
  "Odyssey Web Browser",  
  
  "Firefox 25 (Windows)",  
  "Firefox 3.6 (Windows)",  
  "Firefox 64 (Windows)",  
  
  "Internet Explorer 11",  
  "Internet Explorer 10",  
  "Internet Explorer 8",  
  "Internet Explorer 6",  
  
  "Edge 14 (Windows)",  
  
  "Opera 12.14 (Windows)",  
  "Opera 12.16 (Mac)",  
  
  "Safari 6.0.2 (Mac)",  
  "Safari 7.0.3 (Mac)",  
  
  "Chrome 32 (Windows)",  
  "Chrome 80 (Windows)",  
  
  "IPhone",  
  "IPad",  
  
  NULL  
};
```

Should we still keep old ones too (like, ie6, firefox25, safari6.0.2, chrome32, etc) together with new ones, or ditch old ones in favor of new ones ? I for myself think that having more choice is always better and we can keep all of them.

What you think ?
