Odyssey 1.23 r5_beta02 - AmigaOS4

-- Added bunch of new and up2date user agents to "spooof as".
-- Enabled WebP support
-- WebKit revision number is now presented in AboutBox too
-- Recompiled with more up2date 3d party libraries: libFreeType2 2.10.1, libXML2 2.9.10, libXSLT 1.1.34 and libWebP 1.0.3

Give it a go, if all will be fine we can put new stuff on Github too. Through "webp" rendering still the same "blue color". That needs to be fixed (in odyssey probably, and need to check how morphos version reacts in that terms). But imho better to have it works like this than no having it works at all.
