Odyssey 1.23 r5_beta02 - AmigaOS4

Many thnaks for taking up this work. Already some nice small improvements. The font rendering is much better with this version. Much easier on my eyes.

I did notice that is the beta02 release the \$Ver:: isn't set although the version in the about box is correct.

When I right click on Odyssey beta02 and select version it shows the old version: "Odyssey Web Browser 1.23 (12/25/2013)"
