Found a general bug in address bar, it's not a new one as i can reproduce it in every versions of owb 😞

To reproduce it, do this step passages:

- 1) Identify your browser as iPad 6.1
- 2) Open Google, and type something to search, for example: "Odyssey Web Browser aros"
- 3) Now in Google search, choose "image" (so to search for images the text you typed)
- 4) When thumbnails will be loaded, right click into any of that image and select --> open image in new tab

In the new tab opened you will have this:

<https://imgbbb.com/image/TTrhX6>

Lot of garbages in text of the address bar
