and contains more than 16000 characters!

Indeed you are right .. just selected with copy and paste one of that line-url and got a crazy quantity of 12304 chars !

Means Odyssey seems not able to manage such extra long urls and go mad :)

However it doesn't seems a limitation in other Amiga browsers as just tried the same with NetSurf and everything worked with no glitch at all, so only OWB seems affected to ,, , i'll report it as MUI bug eventually
