@nbache

After a moment, I only had two new messages, but clicking on these only worked as if intended.
Hmm, interesting.

This made me try it out under a clean "public" installation of 4.1FEu1, and there I couldn't reproduce it (so far). It seems it only happens under OS4 beta. I have seen it for a long time, though, so it's not anything that arrived with the latest beta components (nor with the new Odyssey release).

With the second beta, it looks like my crashes using the Unread/New buttons on Amiga.org is gone! At least I haven't seen it happen since I upgraded.

Also, it seems in general more stable and faster than ever.

Good job!

Best regards,

Niels
