Try to unpack beta02 to ram, and then retest everything again.

All right, extracted all versions to RAM and then retried the 2 sites

Spoofing is default (Odyssey Web Browser)

Downloading from <https://tigerskunk.itch.io/inviyya>

Works now, good

But the Dashboard of Transifex website still not, apparently it doesn't work in all versions now, including the public OWB on OS4Depot

Probably they did some changes very recently and that changes are no more compatible with our old webkit .. don't know really
