Ok good

Just an unrelated question, did you changed something in bookmark behaviour since the first beta 1 compared to the public version ?

I ask because i noted i'm unable to "import" the bookmark from my stable release to any of that new betas .. instead everything works fine copying the bookmarks.html file from a beta to another (tested in all versions) ... when i open the bookmark from OWB i can see my saved links, but all the old links i saved with the public version cannot be read in any of that new betas
