Hi kas1e,

Thanks for the version just released,

it's even faster, thank you very much.

I would like to ask a question I tried the fullscreen,

but perhaps it is asking too much for those like me who use an emulation and the resolution would be high without having a dedicated graphics card.

I activated to make the "composite" work in the "GUI" preferences and added the "fullscreen" script as recommended by you in Odyssey.

For me the only way to make it work is to use "PatchCompositeTags" to activate the fullscreen

In this case I would probably ask if possible, if the author of Patch Composite Tag can do something about it because the screen remains black even if the sound is heard perfectly.

It is probably a strange request it would be possible to implement it in some way so that the video can be viewed full screen with "PatchCompositeTag"

For the rest, I'm very happy, that's okay, even if it can't be done.

Thanks again. 😊
