smbfs onlt support SMBv1, but in your NAS (

<https://en.community.sonos.com/advanced-setups-229000/sonos-and-smb-cifs-share-on-openmediavault-6821974>)

...

You must add this line to the /etc/samba/smb.conf file in the [Global] section:

```
ntlm auth = yes
```

This apparently enables SMB V1.

...
