URL:

I did a new test with Odyssey 05 "full screen" using MUI
and I'm very happy,

I used the spoofing listed above:

"Mozilla / 5.0 (iPhone; CPU iPhone OS 12_4 like Mac OS X) AppleWebKit / 605.1.15 (KHTML, like Gecko)

Mobile / 15E148 KAKAOTALK 8.7.8"

I don't have a graphics card but it works very well.

I'd just like to ask:

how do I move the screen that I promote via MUI options.

In practice the screen of MUI remains fixed, instead I would like to have the possibility to move it like any
window.

I have done many tests but I cannot do it.

Thanks and sorry if my question is "OT"

Thanks again to everyone.

here the video if it can be useful to better explain my request
