Everyone who had crashes in `cairo_clip_intersect_rectangle_box()` as the last function in stacktrace (visually it first one at top of stack trace) plz check that binary at top of beta06 installation:

[http://kas1e.mikendezign.com/a/Odyssey\\_cairo\\_fix.zip](http://kas1e.mikendezign.com/a/Odyssey_cairo_fix.zip)

I remember that Raziel had this kind of crashes when visit Scummvm.org, and also Javier when visiting morphzone.org , and also BillBorsari when ajust settings on youtube settings. So give it a go plz, if bug is gone, i can update then cairo library in odyssey's repo.

There i just add 2 fixes from Cairo devs after they release version we use now and which fix all those issues for me. But need to be sure, so give it a go. Thanks
