@BobSacamano

Unfortunately with video cards "Supported" and "actual working on every AmigaNG model" are not always the same thing.

Radeon SI & Polaris Video Cards personally tested with my Sam460ex

| Chip set | Worked |
|----------|--------|
|----------|--------|

|                |                          |
|----------------|--------------------------|
| R7-240 (Oland) | No (Worked on X5000/020) |
|----------------|--------------------------|

|                |                          |
|----------------|--------------------------|
| R7-250 (Verde) | No (Worked on X5000/020) |
|----------------|--------------------------|

|                   |                          |
|-------------------|--------------------------|
| R7-370 (Pitcairn) | No (Worked on X5000/020) |
|-------------------|--------------------------|

|                |     |
|----------------|-----|
| HD7750 (Verde) | Yes |
|----------------|-----|

|                 |     |
|-----------------|-----|
| R7-250x (Verde) | Yes |
|-----------------|-----|

|                |   |
|----------------|---|
| R9-255 (Verde) | Yes (HP OEM card)(HP 767485-001 767071-001) (Single Slot) |
|----------------|---|
