@All

I do not know if any of you watch the numbers of files uploaded on os4depot, but today we reach 4000 ! Last one was Simon's one "InputEventSniffer - Check all kinds of input events" , thumbs up !

I donate now to os4depot a bit. If not orgin (and who else also handle it?) there werent some of us for sure. os4depot is really only one place where you can get os4 stuff and didn't search pieces all over the network.

Hope all developers soon or later will understand that if their stuff not on os4depot, then many users never will know what you do/did/doing. Some of us even didn't visit aminet anymore.

Thanks for keeping it that long!
