I see there are AmigaOS 4 files on Aminet not on OS4Depot, like these games:

http://aminet.net/package/game/wb/DonkeyKong_OS4

http://aminet.net/package/game/wb/Runaway_OS4

Some of the Workbench-games on Aminet also works on AmigaOS 4. Do you think these should be uploaded to OS4Depot too? Some might find these and some system friendly programs useful. Just a thought. :)
