But surely Nova pretty advanced already, taking into account that Hans alone works one, together with Radeon drivers :) Who imagine that we will for real have all those OGLES2 (which is pretty much advanced too), and 3d party apps too like shaderjoy and glsnoop :)

.. and the constantly updates to SDL1 and SDL2 .. you for sure did not forget them considering the heavy test you did ;)

3 or 4 good developers and a bunch of decent testers can improve things a lot, indeed it's good moment for OS4
