Hi kas1e,

I'm using beta 07 works perfectly, thanks again.

Even on winuae use, today I realized that the old version 1.23 and the beta version 03 work perfectly after closing the browser and using emotion-player to watch the videos.

While with the subsequent beta versions 04-07 emotion-player crashes after closing Odyssey.

It is important that I tell you that the version I use of emotion without hardware acceleration

I am equally happy with the great job after a long time.

I wondered if it was possible to solve this problem in some way, perhaps even by replacing, for example, the libraries.

Mickjt-player is not affected by this problem with all versions of Odyssey.

Up to now I thought the problem was winuae.

Thanks for every possible answer and for any help, and thanks again.
