URL:

After having played a YouTube video with Odyssey

I can confirm this weird behaviour with Emotion after having played a video with Odyssey : sometimes Emotion crashes when trying to play the video and sometimes after having played it.

Along with the GrimReaper, I got an Emotion window with this :

Stackpointer: (0x4645dd20) memoryAddress: 0x7a0c07b0

SymbolName: CURRDIR:avutil2.library

Offset: 36 Seg: 1 Segoffset: 81148 function: av\_vlog base: CURRDIR:avutil2.library
