Well, now that we have fullscreen enabled for YouTube video, YouTube doesn't work anymore with Odyssey (no matter what you spoof with).

Youtube still works fine for me using Odyssey Beta 07. Sometimes it takes me to a screen that says your browser is outdated and will not be supported soon but I can click on a continue button and it takes me to the YouTube page. Has a warning at the top about outdated browser but works fine. Videos play in full screen fine as well.

Maybe try deleting your YouTube Cookies before loading the page. When playing with spoofing I have ended up with things not working and YouTube seems to use a cookies to remember your settings so things won't work again until you clear the cookies. Mine works with the user agent set to Odyssey.
